Profile

- Experienced back end Java Developer specializing in FinTech solutions.
- Skilled in leading cross-functional teams with a proven ability to lead teams, mentored developers and deliver scalable solutions.
- Demonstrated success in feature development, system optimization, and resolving critical issues to ensure high availability and reliability.

Skills

Core Java | Spring | SQL | Data Structures | Spring Boot | Microservices

Organizations

Saviynt , Software engineer III	Feb 2024 – present Bengaluru, India
- Contributed to improving product features — such as Request features, mail functionality, security enhancements — and optimized the codebase, resulting in a 10% increase in application performance - Fixed 100+ bugs across key modules, leading to a 30% reduction in reported customer issues - Collaborated with peers through code reviews, technical assistance, and knowledge sharing, fostering team productivity and code quality	
ITC infotech , Senior software backend Engineer	Nov 2021 – Jan 2024 Hybrid
- Implemented CVV purge logic in the Batch module; processed over 100,000 tokens and made all critical parameters configurable - Led Payshield-to-Nshield migration for the Greenbox tokenization component, enabling seamless live transaction processing during the switchover - Built V1/V2 interoperability with MongoDB for the BBBY eCommerce platform and migrated 35 million tokens with zero data loss - Integrated VHTS for Oracle-to-MongoDB migration across core and API modules, improving data access efficiency - Resolved production issues and optimized code by reducing DB calls and minimizing creation of sparse tables, improving application stability	
CitiusTech , Team lead	Oct 2020 – Oct 2021 Remote
Led a team of 5 developers, assigned tasks, and provided technical mentorship to ensure timely delivery and quality - Implemented cash payment feature, contributing to the product’s payment module enhancement - Created JUnit test cases using the Spring testing framework to improve code reliability and maintainability - Resolved approximately 200 issues flagged by Nexus IQ and SonarQube, improving code security and quality compliance	
TCS , Team member & Developer	Nov 2015 – Feb 2020 Bengaluru, India
- Understood and analyzed task flows for developing new features in Loans and Collections modules, including NPA management and loan closures - Designed and documented SQL database structures to support task flow implementation - Acted as Single Point of Contact (SPOC) for the client during onsite posting, ensuring smooth communication and requirement clarity - Developed over 170 JasperReports for client OHB, delivering key business insights and data visualization	
RCS Technologies , Team Member	Dec 2014 – Nov 2015 Bengaluru, India
- Generated various custom reports based on client requirements, including Asset and Store reports, using tools like JasperReports (if applicable) - Developed core functional modules and database structures as per business specifications
